

# Haoyue Furnace Site Conditions Sheet

Public site-readiness template. It does not replace the project layout, foundation drawing, local code review, or approved installation plan.

## Location and access

---

- Installation country, city, and room:
- Door, corridor, lifting, and unloading clearances:
- Floor loading and foundation information:
- Maintenance access around the planned equipment position:
- Local safety, permit, or inspection requirements:

## Electrical and controls

---

- Voltage, frequency, phase, and available capacity:
- Grounding arrangement:
- Control-network or data-export requirements:
- Local emergency-stop or facility-interlock interfaces:

## Cooling and exhaust

---

- Cooling-water temperature, pressure, flow, and quality:
- Return-water or chiller arrangement:
- Exhaust, ventilation, and heat-rejection conditions:
- Drainage or spill-control requirements:

## Process gases and vacuum

---

- Gas types, purity, supply pressure, and storage method:
- Gas cabinet, regulator, purge, and exhaust arrangement:
- Vacuum-pump exhaust routing:
- Hydrogen or hazardous-gas controls, when applicable:

## Handover planning

---

- Planned installation window:
- Site contacts and responsibilities:
- Required documentation language:
- Operator and maintenance training participants:
- Proposed SAT checks and witness requirements:
